

Quality Policy Statement

RenOcean values are the basis for how we behave towards customers, suppliers, society, and our own organization. Through quality management systems based on ISO 9001:2015's principles, we will:

Plan, develop and deliver

smart solutions that meet customer needs, meet the requirements and expectations, and ensure customer satisfaction in the short and long term.

Execute

our services in such a way that we always have enough and appropriate resources in place to operate, develop and improve business processes. We will engage in purposeful and systematic human resource development. Development plans must be viewed in the context of corporate strategic plans and goals. Our combined expertise will always be on par with the technological developments in our industry.

Controlling

fulfillment of customer requirements, customer satisfaction and statutory requirements through process control and overall control.

Correcting

our performance through continuous development and improvement. This will be ensured through a clear commitment from management and established as a joint commitment of the organization. Continuous improvement to ensure our competitiveness and profitability.
